

URL: <https://www.mihaislujitoru.com/it4203/milestone4/>

1) Empty page

When you first arrive to the website you will find a simple page with only the books that are in the shelf are loaded.

2) Clicking on a book from my bookshelf

When you click on a book from the bookshelf, the informations of that book is displayed below. If you click on another book, the previous book is removed and the new book is displayed.

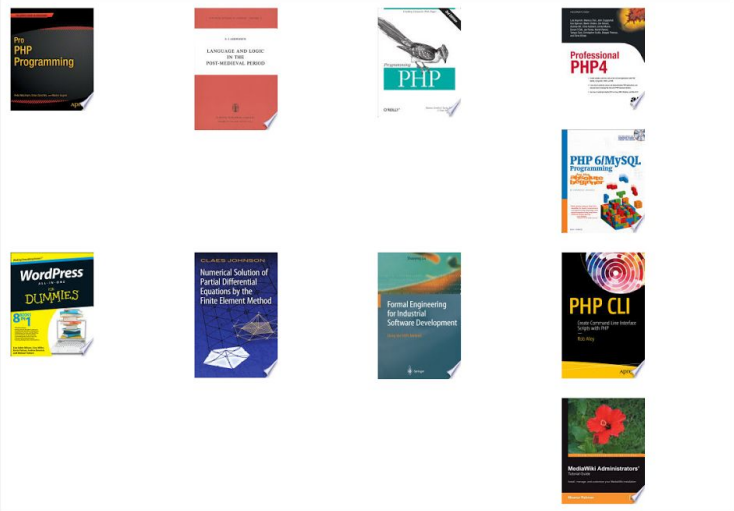

3) Searching books with the search functionality

Milestone 3

Mihai's Books

Search Results

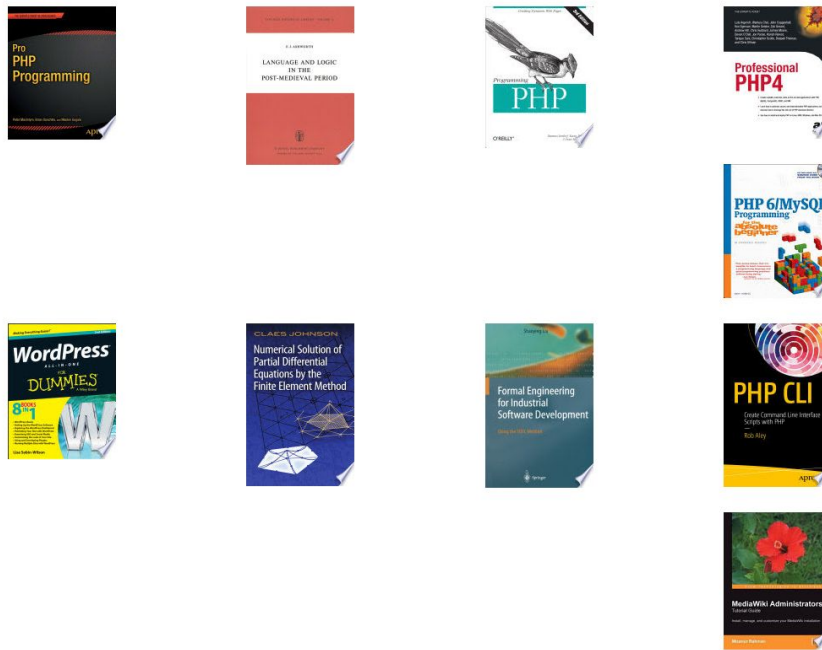

123

Book Details

When you search for a book in the upper corner the books are displayed in the search results. In this example I tested with php and it worked.

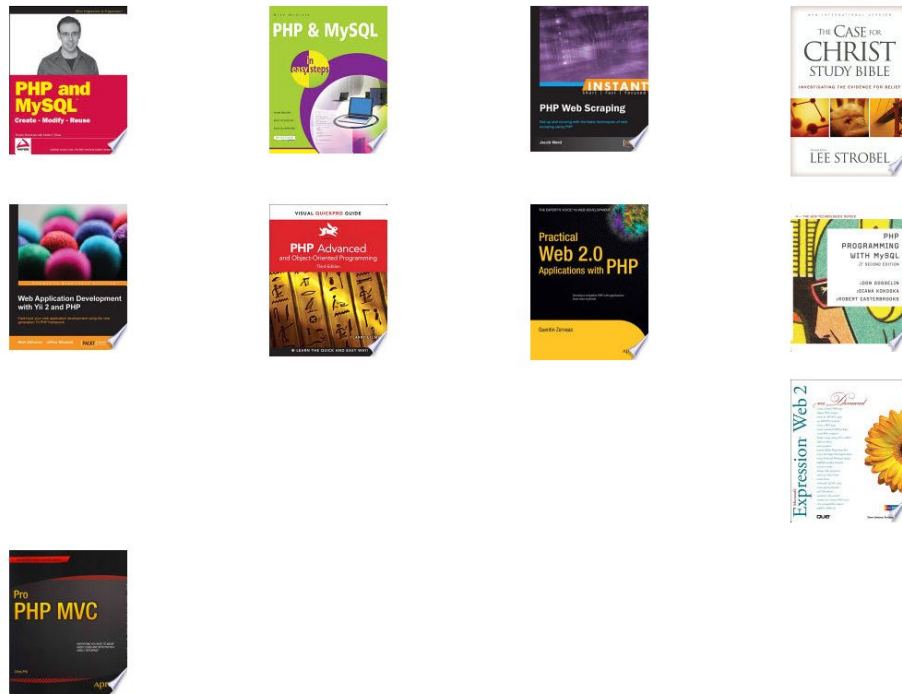

4) Pagination

Search Results

This is the first page of the pagination. It displays a set of 10 unique books

Search Results

1 2 3

This is a screenshot of the second pagination and displays a set of different books from the first pagination.
