There is also an option to search for a movie in the top right corner. For example, if I search for simple “movie” I would get a list of movies. The display options, list or grid is still available.

Searching for a movie, also give you the ability you have a pagination. Unfortunately, I could not understand nor do I have the right amount of knowledge to display the pagination in a dynamic

form and thus the pagination is hardcoded. In the future, hopefully over the christmas break, I would like to find how to do the dynamic pagination.
